

7th Semester	RAU7D002	Automotive Safety	L-T-P 3-0-0	3 Credits
--------------------------------	-----------------	--------------------------	------------------------	------------------

MODULE I**INTRODUCTION TO SAFETY**

Vehicle structural crashworthiness and Crash testing. Design of crash crumple zones, Modelling and simulation studies, Optimization of vehicle structures for Crashworthiness, Types of impacts, and Impact with rebound, movable barrier tests, Analysis and simulation of vehicle in barrier impacts, Roll over crash tests, Behaviour of Specific body structures in crash testing, Photographic analysis of impact tests, Regulatory requirements for crash testing.

MODULE II**SAFETY CONCEPTS**

Active safety: driving safety, conditional safety, perceptibility safety, operating safety, Passive safety: exterior safety, interior safety, deformation behaviour of vehicle body, and Speed and acceleration characteristics of passenger compartment on impact.

MODULE III**SAFETY EQUIPMENTS**

Seat belt, regulations, automatic seat belt tightener system, collapsible steering column, tiltable steering wheel, air bags, electronic system for activating air bags, bumper design for safety.

MODULE IV**COLLISION WARNING COMFORT AND CONVENIENCE SYSTEM**

Collision warning system, causes of rear end collision, frontal object detection, rear vehicle object detection system, object detection system with braking system interactions.

MODULE V**COMFORT AND CONVENIENCE SYSTEM**

Steering and mirror adjustment, central locking system , Garage door opening system, tyre pressure control system, rain sensor system, environment information system

TEXT BOOK

1. Bosch - "Automotive Handbook" - 5th Edition - SAE Publication - 2000.

REFERENCES
