

<b>5<sup>th</sup> Semester</b>	<b>RML5C202</b>	<b>Surface Phenomenon and Froth Flotation Lab</b>	<b>L-T-P 0-0-3</b>	<b>2 Credits</b>
------------------------------------	-----------------	---	------------------------	----------------------

1. Selective flotation of chalcopyrite ores
2. Flotation of lead-zinc ore
3. Flotation study of coal
4. Flotation of lime stone
5. Flotation of dolomite
6. Reverse flotation of silica
7. Effects of reagents dosages, pH, collection time etc. on flotation
8. Flotation study through column flotation cell
