

<b>5<sup>th</sup> Semester</b>	<b>RML5C203</b>	<b>Physical Separation Processes Lab</b>	<b>L-T-P 0-0-3</b>	<b>2 Credits</b>
------------------------------------	-----------------	--	------------------------	----------------------

1. Performance analysis of mineral jig and effect of operating parameters
2. Performance analysis of Wilfley table and effect of operating parameters
3. Performance analysis of Mozely Mineral Separator
4. Performance analysis of spiral concentrator and effect of operating parameters
5. Davis tube magnetic separation
6. Dry magnetic separator (roll type)
7. Wet high intensity magnetic separator
8. Electrostatic separator
