

4thSemester	RPP4C001	Mass Transfer- I	L-T-P 3-0-0	3 CREDITS
-------------------------------	-----------------	-------------------------	------------------------	------------------

Module I: (07 hrs)

Introduction to Mass transfer operations, molecular diffusion in fluids, binary solutions, Fick's law, equation of continuity, steady state equimolar counter current diffusion, Stefan-Maxwell equation.

Module II: (08 hrs)

Diffusivity of gases and liquids, application of molecular diffusion, mass transfer coefficients, in laminar and turbulent flow, Interphase mass transfer, Film theory, Penetration theory, surface-renewal theories, analogy between mass, heat and momentum transfer.

Module III: (10 hrs)

Absorption : Solubility of gases in liquids, two components system, multi components system, ideal and non - ideal solutions, choice of solvent for absorption, single component absorption material balance, counter current multistage operations, dilute gas mixtures, non - isothermal operation, tray efficiency, continuous contact equipment, HETP, HTU, NTU concepts for single component absorption.

Module IV: (10 hrs)

Principle of VLE for binary systems, phase diagrams, relative volatility, ideal solutions, azeotropes, enthalpy concentration diagrams, flash vaporization, partial condensation, differential distillation steam distillation, azeotropic and extractive distillation. Continuous distillation: McCabe - Thiele method, Ponchon - Savarit method, Tray efficiencies, introduction to multi component distillation.

Module V: (10 hrs)

Humidification operations: Definition of fundamental terms, Psychrometric charts, theory of adiabatic saturation and wet bulb temperature, Lewis relation, Gas liquid contact, Dehumidification, Adiabatic Humidification. Equipments: Natural Circulation, Natural draft, Mechanical draft, Spray tower, Spray chamber, Spray pond. Humidity Measurement: Direct chemical method, Hygrometer method, Sling psychrometer, Dew point method, Mirror method.

Books:

- Mass Transfer Operations by R E Treybal, McGraw Hill.
- Unit Operations of Chemical Engineering, 7th ed. by W L McCabe, J C Smith, and P Harriott, McGraw-Hill.
- Design of Equilibrium Stage Processes by B D Smith, McGraw-Hill.
- Principles of Mass Transfer and Separation Processes by B K Dutta, PHI.
- Mass Transfer Operations by A Suryanarayana, New Age International
